

FOREST SECTOR SERVICES

KBM Resources Group is Ontario's leading provider of forest sector services.

KBM's natural resource management professionals deliver practical innovation through a range of consulting, technical and on-the-ground services.

KBM provides state of the art aerial surveying and geomatics, forest management planning, site preparation, inventorying, and audits.

KBM has contributed to the development of a sustainable forest sector since 1973. KBM has local knowledge and extensive experience in Central Canada.

AERIAL SURVEYING and GEOMATICS

Full range of digital image collection, analysis, and custom map generation services

- Three dedicated aircraft based out of Thunder Bay, Ontario
- Trimble Harrier 68i advanced laser scanning and imaging system (LiDAR)
- True colour and high-resolution (3-50cm) geo-referenced image acquisition
- Photo analysis by certified photo interpreters; LiDAR data processing and analysis
- Imagery-derived digital terrain modeling, including elevation, volumes, and hydrology
- Digital 3D and traditional mapping; professional map plotting services
- ArcGIS server hosting services

TECHNICAL FIELD SERVICES

Consistently reliable field surveys, imagery interpretation and monitoring

- Remote field data collection by forestry staff with extensive experience
- Photo interpretation to support forest resource inventories, free to grow assessments, access planning, and right-of-way vegetation monitoring
- Natural resource inventorying, aggregate location/classification, and road layout
- Site assessments and expert guidance related to natural resources, ecology, biology, and water quality management

CONSULTING

Practical planning and management to maximize natural assets

- Forest management plan development
- Forest land holdings management
- Economic development opportunity assessment
- Permitting and licensing
- Policy advice for effective natural resource management
- Exchange of forestry products and practices with international markets

COMMUNITY RELATIONS

Productive relationship-building, planning, and joint ventures

- Values mapping and traditional ecological knowledge compilation
- Sustainable Forest License plan development
- First Nations training and capacity building projects
- Stakeholder consultation workshops and public information sessions
