

Forestry Technician and Seasonal Forestry Technicians

About Us:

KBM is an independently-owned natural resources consulting firm offering a range of services to clients in both the private and public sectors. Since 1974 we have been headquartered in Thunder Bay, ON along the north shore of Lake Superior. In 2011, KBM opened an office in Prince Albert, SK and in 2024 we opened two additional office locations in Yellowknife, NWT and Fredericton, NB. All locations attract outdoor enthusiasts to explore the endless networks of parks, trails, rivers, and lakes.

KBM operates three tightly integrated business units: KBM Aviation, KBM Geomatics and KBM Field Services in addition to operating KBM Outdoors (and outdoor equipment and supplies retail store). KBM's Field Services division has an operational territory that spans across Canada with most work occurring in Ontario, Manitoba, and Saskatchewan. KBM provides a flexible, dynamic, and challenging work environment with opportunities to further your skills in a team-based atmosphere. Additionally, we offer competitive compensation and opportunities for growth within the company.

Job Description:

We are currently seeking full-time and seasonal Forestry Technicians based in our Prince Albert, SK office. As a forestry technician you will be responsible for participating and leading projects that include (but are not limited to) forest renewal, forest health surveys, forest harvesting, forestry road development and maintenance, and the surveying of utility lines. Frequent field work during the summer months is a requirement of the job. The successful applicant must be willing to travel and be willing to work outside in all weather conditions. Certain projects will include the need for small fixed-wing or rotary wing aircraft to access the project location. The successful applicant should be comfortable riding in these types of aircraft. Office work components will include contributing to reports, proposal writing, and general project management. The successful applicant should be familiar with the standard MS software suite (Word, Excel, Access) and ESRI products (ArcMap, Pro, AGOL).

Required Skills:

- Valid class 5 driver's license.
- Comfortable working independently in remote areas and travelling for extended periods of time.
- Demonstrated safe operation of an all-terrain vehicle and able to successfully complete applicable safety courses.
- Familiarity with tablet-based data collection applications (e.g., Survey 123, ArcGIS Field Maps).
- Superior organization skills.
- Willing to work in a team environment.
- Willingness to work outdoors in all weather conditions.

Other skills that are considered assets include:

- Demonstrated experience using GNSS systems for navigation and data collection.
- Proficient use of ESRI suite products (ArcPro, ArcMap, AGOL, Field Maps, Survey 123, etc).
- Demonstrated experience working outdoors.

Education and Experience:

- Minimum one year post secondary education in natural resource management, biology, forestry, geography, or related study
- Minimum one-year experience working as a forestry technician or a related discipline.

The successful candidate will be self-motivated, dependable, able to work individually as well as within a team. Remuneration will be based on education, skills, and experience.

To express interest in this opportunity, please forward a **cover letter** and **resume** to Kerry McIntyre (kmcintyre@kbm.ca) and cc Eric Bongelli (ebongelli@kbm.ca) with the subject line “2026 Forestry Technician”. We appreciate the interest of all applicants, however only those selected for an interview will be contacted.

There is no specific deadline to apply for this position. Qualified candidates will always be considered. However, there will be limited positions available. Interviews will commence in February 2026. You are encouraged to apply early.
